

Dolly Bar Assembly Quick Reference Guide

1. With Spring Buttons facing down, insert Hitch into Dolly frame until Spring Buttons click into place. Both sides of Hitch forks need to be installed evenly or they may get stuck.

2. Place the silver Connector Pins into Hitch until Spring Buttons click in place.

3. For Push Bar, insert silver Connector Pin between curved bars. If a Panel Bar, add the 15 inch Extension in the middle.

4. Assemble curved bars over Connector Pins in the Hitch. Both sides of bars need to be installed evenly. Bars will be a tight fit so a twisting or shaking motion will assist assembly until Spring Buttons are clicked in place.
